

ESD electrical workplace

for the repair of electrically operated appliances

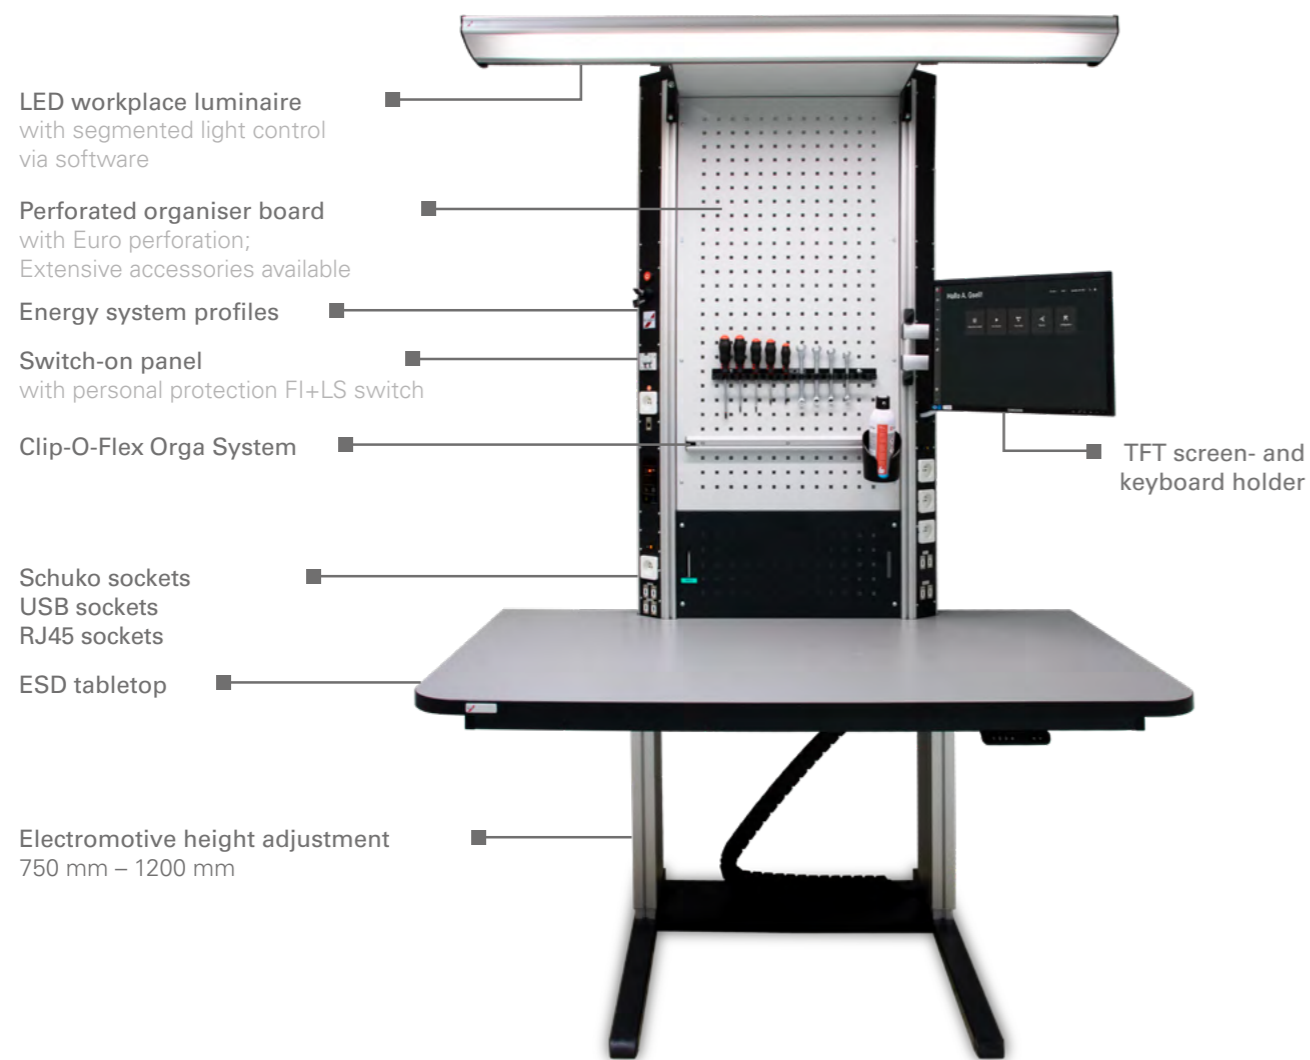

Typical applications

Equipment

primus one repair workplace

The well thought-out workplace concept supports your employees with their tasks in the best possible way. The electromotive height adjustment, the LED lighting with segmented light control and optimum reaching spaces ensure maximum ergonomics. A comprehensive ESD concept, which includes a special ESD tabletop and various accessories, ensures the protection of the products during their repair. The individual equipment of the primus one energy column completes the optimal equipment of the workplace.

ESD monitor

The ESD monitor is used for continuous ESD monitoring at the workplace. The correct earthing of the table top and of the employee are constantly recorded. In the event of a fault, a signal is given.

primus one system profiles

The primus one system profiles can be individually equipped according to your requirements. Choose between switch-on panels with personal protection, IT sockets, emergency stop, ESD monitor, CEE and Schuko sockets and much more.

Electromotive height adjustment

The electromotive height adjustment is adjustable continuously between 750 mm – 1200 mm and can thus be optimally adapted to the requirements of different employees and products to be repaired. The maximum surface load is 250 kg.

Your benefits

Ergonomics

Through the electrical height adjustment of our workstations, optimum reaching spaces and perfect illumination, we ensure maximum ergonomics and thus the long-term health and motivation of your employees.

Safety

Our personal and ESD protection devices provide optimum protection for your employees and products.

This reliably prevents not only downtime but also complaints.

Flexibility and future-proofness

Our solutions convince through their outstanding durability. Since the products to be repaired can always change over time, you can expand our workstations or adapt them to new conditions at any time.

Quality

With ELABO repair workstations, you are optimally equipped for an efficient repair process. Material and tools are neatly stowed away. The work surface remains free and leaves room for the essentials: An error-free repair and 100% quality.

ESD product certificate
Required for repairs to
electronic components

You can find more
information about ESD here.

Complete solutions for your workshop

Tidiness is the basis for efficient work. And we have the right solutions for this. Starting with tall cabinets to (mobile) side cabinets or workbenches with drawer cabinets. We will be happy to advise you on individual storage space solutions for your requirements.
